Vubiq Networks Appoints John Dilworth as Chief Executive Officer

IRVINE, CA, June 20, 2016 – Vubiq Networks, Inc., an innovator in 60 GHz V-Band wireless broadband solutions, today announced that John Dilworth has been named Chief Executive Officer (CEO). Previously serving as VP of Business Development, Mr. Dilworth will replace departing CEO Ed Snyder, who has stepped down in order to pursue other opportunities.

“The Vubiq Networks board is pleased to announce the appointment of John Dilworth as CEO, effective immediately,” said Flip Huffard, Vubiq Networks Chairman of the Board. “Over the past 16 months, John has made outstanding contributions to the ongoing success of the company. In his new role, he will drive the company’s continued innovation in the 60 GHz V-Band wireless market, while refocusing the company on building strategic partnerships and OEM relationships.”

Mr. Dilworth joined Vubiq Networks in February 2015. Previously, he served as VP of Sales and Marketing at GraphOn Corp., where he was responsible for the development of global business models and channel partner programs. Under his leadership, GraphOn saw substantial increases in revenue as he developed an extensive worldwide distribution network comprised of value added resellers, distributors, and OEM partnerships.

“John’s management and technical background, strong relationship skills, and proven ability to form highly productive alliances with top-level decision makers and business partners will help Vubiq Networks focus our organizational structure while more effectively expanding our business opportunities,” said Mr. Huffard.

“I look forward to my new role and responsibilities, as well as the opportunity to further expand our innovation and presence in the millimeter wave marketplace,” said Mr. Dilworth.

Vubiq Network’s flagship product, the HaulPass V60s™ Gigabit Ethernet wireless link, is a point-to-point 60 GHz millimeter wave data connectivity solution that delivers low-latency, full-duplex Gigabit Ethernet transport speeds. Housed in a small, lightweight, ruggedized enclosure that is cost-effective and easy to deploy, the HaulPass V60s meets the ever-expanding needs of today’s bandwidth-hungry networks.

About Vubiq Networks

Vubiq Networks, Inc. is a privately held wireless networking technology company headquartered in Irvine, California. The company’s focus is on high-bandwidth, 60 GHz V-Band wireless link transmission products that enable gigabit speed transport for broadband wireless fiber extensions, wireless metropolitan area networks, and mobile backhaul applications.
